Greetings Fellow Sugarmakers,

Welcome to the 2025 Maple Equipment Catalog,

Hoping this finds all of you happy and healthy! Hard to believe that spring will soon be upon us again. Feels like this letter comes earlier and earlier each year.

We here at the Roth Sugarbush are also ready for sugar season. We have a large inventory of new equipment and even some used equipment (which comes and goes quite quickly). We stock several different sized evaporators with all the necessary components, storage tanks, tubing and accessories, a variety of containers, as well as many other supplies and miscellaneous equipment.

We are pleased to say we have a growing team. Our tubing installation crew has grown so we are able to take on more jobs and better assist with everything from the layout of your woods to final installation. We also will do maintenance on existing woods and consulting work if needed. So just give us a call and chat with our professional team.

Our annual Open House will be held again this year in the first full week in February. The dates are set for Wednesday February 5<sup>th</sup>, Thursday, February 6<sup>th</sup>, Friday February 7<sup>th</sup>, and Saturday February 8<sup>th</sup>. We will again be offering a delicious FREE lunch and complimentary coffee and donuts starting at 8:00 am each day. As always, we will offer a 5% cash and carry discount with larger discounts on certain items. Please call ahead with any orders to help with your wait time. We will be having seminars and guest speakers during our open house, please watch our website and Facebook page for updates on them.

We sincerely thank you for your continued business and support,

Peter & Dawn Roth  
Kellen & Sam O'Connell

# Signature SPOUTS

## MINIMUM RESTRICTION

The 45° angle facilitates sap flow and prevents residues or unwanted bacterias from accumulating.

## PERFECT SEAL

Resin conforms to the shape of the tap hole and adheres to the bark.

## SPOUT LENGTH SUITS ALL BARK THICKNESSES.

Thin wall maximizes sap flow while minimizing tree damage.

## THE PERFECT CHOICE FOR YOUR SUGARBUSH

### LONG LASTING 5/16" SPOUTS

The 15° angle gives a good clearance between the drop and the tree

The opening at the tip of the spout lets the sap flow into the spout more easily, optimizing your yield of your drawoff.

## THE SOLUTION TO PREVENT MICRO-LEAKS

### BETTER GRIP ON TUBING!

The line of 5/16" Maxflow fittings was specifically designed and developed for maple producers wanting to operate over 25 in-hg (high vacuum). These fittings enable a perfect seal with a vacuum level beyond 25 in-hg and offers the following advantages:

- > No parting lines on the first barb.
- > Precision moulding.
- > Eliminates micro-leaks caused by molding lines.
- > Better grip on the tubing.
